Business Training that encourages people to learn

Business training has changed significantly in recent years and many business trainers face the same challenges: -

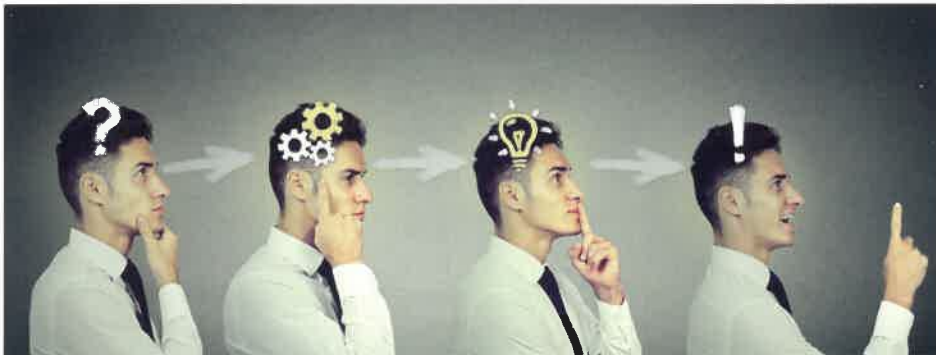

- Learners who attend webinar training but, don't fully absorb its content
- eLearning which is little more than a PowerPoint presentation that individuals complete with very little knowledge retention
- Delegates who attend classroom training but have no knowledge of what is going to be covered or how it will apply to their job role
- Action plans that are produced at the end of classroom training which are not supported or followed up

Business Training needs to change, learners demand a more engaging training environment that is fun, one that motivates, one that encourages them to learn, an environment that is flexible and gives information in a way that they would like to receive it.

Businesses too demand more, training that is not only rewarding for the learner but training that can have a positive business impact.

We have created a **NEW** Blended Learning Training Solution one that combines digital and social learning with a fresh approach to face-to-face sessions supported by webinars that are fun and motivational.

We call it ENGAGE

It's time to ENGAGE!

ENGAGE can be used to complement your existing training programmes to help improve their effectiveness or we can develop a bespoke solution to meet your own defined learning outcomes.

ENGAGE consists of 4 elements:

Activate – The action-based learning platform which is available to learners 24 hours a day. It tracks the learner's progress, is motivating and rewards achievement. It allows learners to share evidence of application and provides confirmation of business impact.

Flipped Classrooms – The new way to ensure that time in the classroom is well spent. Learning outcomes are clear, and we make good use of Task Centred Group Activities helping learners understand 'what good looks like'. We provide one-to-one support and include experts to help confirm business application.

Webinars – These are produced to support the key learning outcomes, they help clarify key actions required and provide positive motivation for the learner.

Personal Learning Network – Each learner is part of a group that takes on the journey together, we encourage them to share successes, provide Peer-to-Peer support and they receive help and encouragement from the Fourmative Facilitator.

With ENGAGE you can be confident that learners not only become more knowledgeable but are able to demonstrate competence and provide immediate business impact.
